

SYLLABUS

1. Data about the program of study

1.1	Institution	The Technical University of Cluj-Napoca
1.2	Faculty	Faculty of Civil Engineering
1.3	Department	Mecanica constructiilor
1.4	Field of study	Civil Engineering
1.5	Cycle of study	Bachelor of Science
1.6	Program of study/Qualification	Civil, Industrial and Agricultural Buildings /Engineer (English language)
1.7	Form of education	Full time
1.8	Subject code	60.0

2. Data about the subject

2.1	Subject name				Proiectare asistata de calculator						
2.2	Course responsible/lecturer										
2.3	Teachers in charge of seminars										
2.4	Year of study	4	2.5	Semester	2	2.6	Assessment	C	2.7	Subject category	DS/DI

3. Estimated total time

3.1	Number of hours per week	3	3.2	of which, course:	1	3.3	applications:	
3.4	Total hours in the curriculum	42	3.5	of which, course:	14	3.6	applications:	
Individual study								hours
Manual, lecture material and notes, bibliography								9
Supplementary study in the library, online and in the field								9
Preparation for seminars/laboratory works, homework, reports, portfolios, essays								9
Tutoring								2
Exams and tests								4
Other activities								0
3.7	Total hours of individual study		33					
3.8	Total hours per semester		75					
3.9	Number of credit points		3					

4. Pre-requisites (where appropriate)

4.1	Curriculum	-
4.2	Competence	-

5. Requirements (where appropriate)

5.1	For the course	Projector
5.2	For the applications	1 computer for each student

6. Specific competences

Professional competences	At the end of the course the student will be able to realize a full structural analysis of a steel, reinforced concrete or mixed steel- reinforced concrete real structure. The competence of the student will be on most types of structures: 2 dimensional structures (frames, trusses), 3- dimensional structures (3D buildings, 3D trusses), panels, silos, retaining walls a.s.o.. The student will be able to get the data needed to design each element of the structure (stresses, internal forces, displacements).
Cross competences	-- computer use; -- a set of software; -- Romanian and European design codes prescriptions for structural design; -- Analysis of structures by matrix formulation

7. Discipline objectives (as results from the *key competences gained*)

7.1	General objective	The main goal of this discipline is to assure the student to be able to realise a complete structural analysis of a steel, reinforced concrete or mixed structure by using computer tools.
7.2	Specific objectives	<ul style="list-style-type: none"> - knowledge of the software to use; - modelling of the material, structure and supports; - modelling the actions and loads; - introduce combinations by design code; - find internal forces diagrams on all elements; - find moment maps on panels, diaphragms; - find displacements and deformations

8. Contents

8.1. Lecture (syllabus)	Teaching methods	Notes
1) The discipline main characteristics, goals and expectations	-	Power Point presentation, 2 way discussions, solved examples.
2) Modelling the material, structures, supports and loads. European materials and products databases presentation.		
3) European Design Codes prescriptions guidance.		
4) Wind action and Seismic action computer modelling.		
5) Matrix Analysis of structures – Basic Elements.		
6) Matrix Analysis of structures – Force Method.		
7) Matrix Analysis of structures – Displacement Method.		
Bibliography		
Bibliography: Autodesk Robot Structural Analysis User Guide, M. Petrina et al “Matrix analysis of structures”, U.T. Press 2007, ISBN 978-973-662-351-6		
8.2. Applications/Seminars	Teaching methods	Notes
1) Software general presentation (Autodesk Robot Structural Analysis)	Direct description of the work,	-

2) Material and cross sections European databases. European design codes software implementation. Supports modelling.	solved example, individual and group explanations.	
3) Structural analysis of 2 dimensional steel frames.		
4) Structural analysis of 2 dimensional reinforced concrete frames.		
5) Structural analysis of 2 dimensional steel trusses.		
6) Structural analysis of 3 dimensional steel trusses.		
7) Structural analysis of a plate and diaphragm.		
8) Structural analysis of a real reinforced concrete structure with 3d frames, panels and diaphragms. Part 1: Modelling the material, structure and supports.		
9) Structural analysis of a real reinforced concrete structure with 3d frames, panels and diaphragms. Part 2: Actions and loads on structure according design code prescriptions.		
10) Structural analysis of a real reinforced concrete structure with 3d frames, panels and diaphragms. Part 3: Internal forces diagrams, moment maps on panels and diaphragms, displacements.		
12) Structural analysis of a steel-reinforced concrete structure. Part 2: Actions and loads on structure according design code prescriptions.		
13) Structural analysis of a steel-reinforced concrete structure. Part 3: Internal forces diagrams, moment maps on panels and diaphragms, displacements.		
14) Final Test		
Bibliography

9. Bridging course contents with the expectations of the representatives of the community, professional associations and employers in the field

The contents of the course and the objective of the discipline is to assure the Civil Engineer the possibility to work within structural engineer consultant companies in Romania and in the European Union. The employers in this field expect the junior civil engineer to be able to analyse a structure, design the structure and draw the execution details. This course assures the first mentioned ability.

10. Evaluation

Activity type	10.1 Assessment criteria	10.2 Assessment methods	10.3 Weight in the final grade
10.4 Course	Ability to write about subjects presented during lectures	On site written test	50%
10.5 Applications	Ability to analyse a real structure by computer aid	Computer test or semester project	50%
10.6 Minimum standard of performance			
-- In order to pass the written test the student has to prove good knowledge of lectures contents; -- In order to pass the computer test the student should realise at least the correct modelling of the structure and supports by computer aid.			

Date of filling in:		Title Surname Name	Signature
	Lecturer		
	Teachers in charge of application		

Date of approval in the department 19/06/2025	Head of department conf.dr.ing. Anca-Gabriela POPA
Date of approval in the faculty 25/06/2025	Dean prof.dr.ing Daniela MANEA
